And yes, your theft. What you can do is be diligent. If you are pirating and all this above do not make sense to you, then I think you probably live a very empty life. Who's there to help? Do you mind if someone invades your home and steals something from yours? Unless the author / developer has unlimited funds to beat ... think for a second of the rippling effect ... a product that will guarantee innermost hours of fun for the future. I just wanted to add my 2 cents. Everything that needs is helping with your contribution. Money I think is very deserved. Nice to us, but I'm sure of a programmer. It's worth every penny. I think someone (Savas) is trying to get modest points here! Good job! A € à à € à € The thing is that I never wanted to try the demo! From the Fichroum, I immediately saw that this FSP will be big, and I wanted to be part of this experience, so I bought it immediately. If you read by the Fonuns here, and in several sites, you will see the level of pleasure that many have managed to fspengens. Exceptional work too. For those who have felt that FSP offers was missing on the SIM flight, it is now available. Something very rare on a product like this ... -- Savas A à € à € à €! I will not add anything ... Many who tried to end up buying the software because it is really good (I personally have spent thousands ... yes thousands of dollars in postponement of public services, A aircraft, for scenarios, etc.). A € à à € à € Good statement! People should not have reasons to pirate, already that the demonstration contains the complete functionality, limited only to a departure airport. With today's prices, the cost of the FSP give me 3/4 of a tank of GÀis for my car, 2 movie tickets and a small popcorn and maybe a drink, or a meal Decent in a MEDICAL RESTAURANT. And we do not want to keep it like this ... Even if you are doing a minimum salary, you are spending less than a salary day for the FSP, but withdrawing money from dan's work. I'm using the free version and I feel guilty that I bought yet, but I have to wait for the final of the month for my finances to allow me to buy it (so the wife does not kill me) ... For those who purchased it ... therefore, the products are less than that may be due to restricted financing. Post edited (08-18-05 12:18) à , à € à € e Very good post! I did not notice why it was a sticky ... So if you're someone who is using a pirate version ... à , à € à € e A regretful sinner !!! Glad you finally bought! Pay À , à € à € à à € e I am happy to hear it all. -Matt à , à € à € e Here, and very well put Savas. And the less income, greater the financial pressure on people like Dan to build on all the features he would love ... Sorry for not responding earlier. Now, what many people forget is that, cracking software like this or using a cracked software version there is also another thing that can be considered as theft ... Think about it before you do it, and just legitimately buy FSP. In essence, you are knocking on Dan Portfolio when you download a cracked software version. To develop a product like this requires a lot of work (time) as well as dedication. Would you steal a video game from a store? So I'm just waiting for the connection. Not for lack of dedication, skill or knowledge, but for lack of financing ... do not do it. Let's start with why I'm posting it. However, he had hours that become days, who become months and years of total pleasure in something that we all enjoyed ... Flying flight. As you mentioned in this post ... the developer, that we all know that it is Dan, stated that he worked innermost hours ,ossi ,ossi rezaf euq mÀt ofÀn selE ...adner ad masicorp naD omoc saossep euq ed otaf o .PSF They are ... captain b737 ng à , à € à € à à € à € e Edited (08-18-05 10:55) & quot; Blessed are those who can laugh at their own mistakes because they will never leave Of fun & quot; A € à € à à € à € à € e Swiftfoxlit wrote: Very well, although I have a little thing to confess: I really tried to look for a slit for fspengens, but it was so good that I ended up buying from anyway Erm, me 2, but I have to say, worth every penny of the £.20 that cost £ à € à € e Very well said Savas ... À % on the purchase price click on "A Tight money for you "Icon to see Prepare is no longer an excuse since the month, I leave this topic as it is for registration Best Greetings Dan ( Author of FSP) This is not about where to get cracked or illegal FSP, but if you considered, please take a few minutes to read all the way. Decent products, some superfatured in my opinion, and some great products like ESF, but their customer support is one of the worst. Pay à , à € à € e I will not ... think that if everyone pirates products like these that we will not have this type of program to have fun . Do not steal his work. If you find a cracked cord, send it to Dan. Think of a world without Adons like this for your favorite game ... Do not you believe it's deserved? This by their contributions as their contributions are making this supplement to the Community. See companies like lake. If money is a better tight budget. So, before attempting to install a "cracked" version, or even look for one, remember that a man and some helpers did something incredibly useful for nonsense. Most people do not. Developers. Diligent work in this. Think your contribution (if you buy the program) will result in a growing product ... you just aAcov aAcov arap sam ,sele arap oEÀn 7oslob oirpArp ues od 04\$ sehl-agertne e m©Augla aAv I to make our experiencia fs even more pleasant. These developers work innermost hours to make a decent program. Do not get out and eat that night. Which means that the user's base is smaller and when it has a smaller basis of usager, the amount of potential income is, of course (not saying that it is not a good income ), but the more people who use cracked versions will, in force, in force on that smaller users base ... although as far as Frais Dan, and we explain why "stealing is bad" to others What is so bad to spend some dollars in a program? In addition, those who use the free version ... FSP adds a lot to your experience. Before you look for the cracked version somewhere on the World Wide Web, consider this. Then think about how you can even take advantage of the program, knowing that you are helping the author to improve it with the purchase of the program ... Before you think I'm affiliated with the FSP anyway, I'm not, I agree with everything you said, especially the fact that using a crack is stealing software. The more people buy the product, the more income and in return, the better the product will become. Eat at home. This is a great product and we have a very dedicated developer (DAN) and community ... This is a hope that they can read this before considering the attempt to install a site's FSP without really comprehensive, legitimately. One year of work. I know it's not obligatory, but think of buy it if you really like it ... I'm kind of this post will have little / no effect on somebody piratar software. But I can honestly say that these are the most pleasant compliments à € à € e
